

- c) Only after the obstruction has been removed, 'X' or 'Y' may allow this train or any other train to enter the 'X'- 'Y' block section .

5.3. a) Working of trains required to go beyond the First Stop Signal at a class B station – Diodo Handle type tokenless block instrument (G.R. 8.13):

When 'X' requires to send a train partly or fully outside the Outer signal or Home signal (in case of stations equipped with Multiple Aspect signalling) in the direction of 'Y', he shall obtain 'Line clear' from 'Y' explaining the reason which shall also be recorded in the Train Signal Register at 'X' and 'Y'. The Station Master shall then issue to the Driver a written authority authorising him to proceed outside the Outer signal or the Home signal (in case of stations equipped with Multiple Aspect signalling) and return to 'X' and obtain his acknowledgement. The departure signals can be taken 'off'. When the train returns, the reception signals can be taken 'off' using switch S 2 and following the procedure for closing the line as detailed vide para 3.2(C).

b) Working of trains required to go beyond the First Stop Signal at a class B station – Kyosan / Podanur Push button token less block instrument (G.R. 8.13):

When 'X' requires to send a train partly or fully outside the Outer signal or Home signal (in case of stations equipped with Multiple Aspect signalling) in the direction of 'Y', he shall obtain 'line clear' from 'Y' explaining the reasons which shall also be recorded in the Train Signal Registers at both 'X' and 'Y'. He shall then issue to the Driver a written authority, authorising him to proceed outside the Outer signal or the Home signal(in case of stations equipped with Multiple Aspect signalling) and return to 'X' and obtain his acknowledgement. The departure signals can be taken 'OFF'. When the train returns, the reception signals can be taken 'OFF'. The procedure for setting the block instrument to 'Line closed' condition as detailed vide para 3.3 (c) should be followed.

5.4. 'Cancel last signal' :

a) Diodo Handle type block instrument:

If 'X' has obtained 'Line clear' from 'Y', and finds it necessary for any reason, to cancel the 'Line clear', 'X' must call 'Y's attention. On getting the acknowledgement from 'Y', 'X' must inform 'Y' on the telephone the reasons for cancelling the 'Line clear'. The procedure as detailed vide para 3.2(B) should be followed.
